The Illinois Legislature has come down handsomely for the State Exhibit at the Great Columbian Exposition. A very handsome display can be made for \$1,000,000, and the State will do itself proud. Every other State in the country should contribute something for a State exhibit, and Kentuckyy should not be behind in the procession. We probably have more to show and more need of advertising than any other State in the Union, and we should certainly take this opportunity of advertising our wares. Not only the whole of this country, but the whole world will be at the big Chicago show, and there is the proper place for Kentuck to display her mineral, vegetable and animal wealth. A Kentucky building filled with Kentucky products and managed by an entertaining committee of Kentuckians would cause the eyes of many a stranger to be turned in this direction. All Kentucky needs is good judicious advertising. To have the attention of the world called to her wealth and her merits as a point of investment. There is plenty of loose capital hunting just such opportunities os Kentucky affords.-Louis-

The Medical Profession.

The attitude of the medical profession toward what is known as "patent medicines" is not at all unreasonable. Thousands of these nostrums are offered to the public every year. Some of them are dangerous, and most of them are futile. Swift's Specific (S. S. S.), we are glad to say, is not classed among these nostrums. It has overcome the wholesome prejudices of the physicians in all parts of the country, and some of the strongest testimonials in its behalf come from the medical men who have used it in their practice, and who do not hesitate to endorse its wonderful results. This is extremely gratifying, but by no means astonishing, for every claim that is put forward in behalf of S. S. is based on a series of actual experiments extended over a long period of time.

It is very amusing to hear these wild eyed high tariff men talk about the Mc-Kinley bill. They tell us that under the beneficent influence of that measure the "Peter Piper Picked a Peck of Pickled price of every necessary of life is sinking lower and lower, like an ebbing tide. thing goes on much longer. Facts are very ugly things. You can't smooth their wrinkled brows with flattering rhetoric nor make them sweet tempered with special pleading. And one of these ugly facts which will "meet us at Philippi" or at the polls in the year of our Lord 1892 is that the McKinley bill is the biggest sham and humbug of the generation. It is a cheat and a lie from the enacting clause to the last syllable. The poor man gets no more wages, gets no more work, gets no more anything. Yes, we mistake, he does get one thing-he gets left. It costs him more for his table and for his wardrobe, more for medicine and more for the coffin in which he buries his dead. The McKinley bill is a curse which dogs his steps at every turn and follows him to the grave. That is the issue for the next campaign and the people will make it red hot for the party bosses and tricksters who have played them for fools,-N. Y. Herald.

Royal Germetuer is established as a remarkable success. Thousands of testimonials attest its virtue. Many of these are given by men and women of the highest standing in the most honored

buy it at any price, but the managers feel that a medicine which possesses such wonderful powers should be placed within the reach of the poor. Many have said that Germetuer was the cheapest medicine on the market. When it is remembered that a bottle of Germetuer makes a gallon of medicine ready for use, it is certainly cheaper than ordinary medicine in a bulk, and when the powers of the medicine are taken into account, the price amounts to almost nothing.

Germetuer is the coming success that has already come. Ask your druggist for it, and if he cannot supply you write to E. M. Coleman, General Representaderful cures.

Facts About Taxes.

The Washington Post presents some interesting tax figures:

For the next two years our Government will spend annually more than

\$500,000,000. To pay one year's expenses of the Government it will take nearly the combined wheat and oat crop.

Our annual output of gold, silver, copper, iron, coal, petroleum and lead will not foot our tax bill for twelve months. Nor can we do it with a year's product of cotton, wool, rye, barley, wine, potatoes and tobacco The combined capitalization of our

national banks is \$599,000,000. One year's taxes will nearly swallow it up. Now, all this is the Federal tax. We have also to pay city, county and State

We pretend to be a nation of plain people, with no arristocracy, no Princes, no standing army and no expensive frills, and yet our taxes are more enormous than those of Austria, Germany or

Great Britain. When we calmly consider these facts and figures it must be admitted that the outlook is not very encouraging. But such evils always lead to a reaction. The people will be forced by stern necessity to demand reform or revolution, and in a country like ours such a state of public sentiment is bound to crystallize into re-
